

Assignment 3 Examples – Project Overview assignments by past students

The files in this folder contain exemplary assignments on a project overview completed by previous students of FIT5190 Introduction to IT Research Methods. Each student has agreed to have their work to be shown to others as examples of what is expected in Assignment 3: Overview of a Research Project.

Each exemplar assignment has a written report and a slide presentation.

These are ONLY examples which would give you ideas of what is expected in the assignment. None of the exemplar assignments is perfect, but all achieved an HD grade overall. Each assignment has its own strengths and weaknesses.

Please treat these exemplary assignments professionally and respect the copyright and privacy guidelines.
