

Distributed Intelligent Video Surveillance System Based on Android Phone

Zhang Yuxin

Traditional Video Surveillance System

Disadvantages of Traditional

- Large and Easy-Exposed
- Hard to Install and Remove
- Low Mobility
- Over-Reliance on Monitor Environments

Requirements For A State-Of-The-Art Distributed Intelligent Video Surveillance System

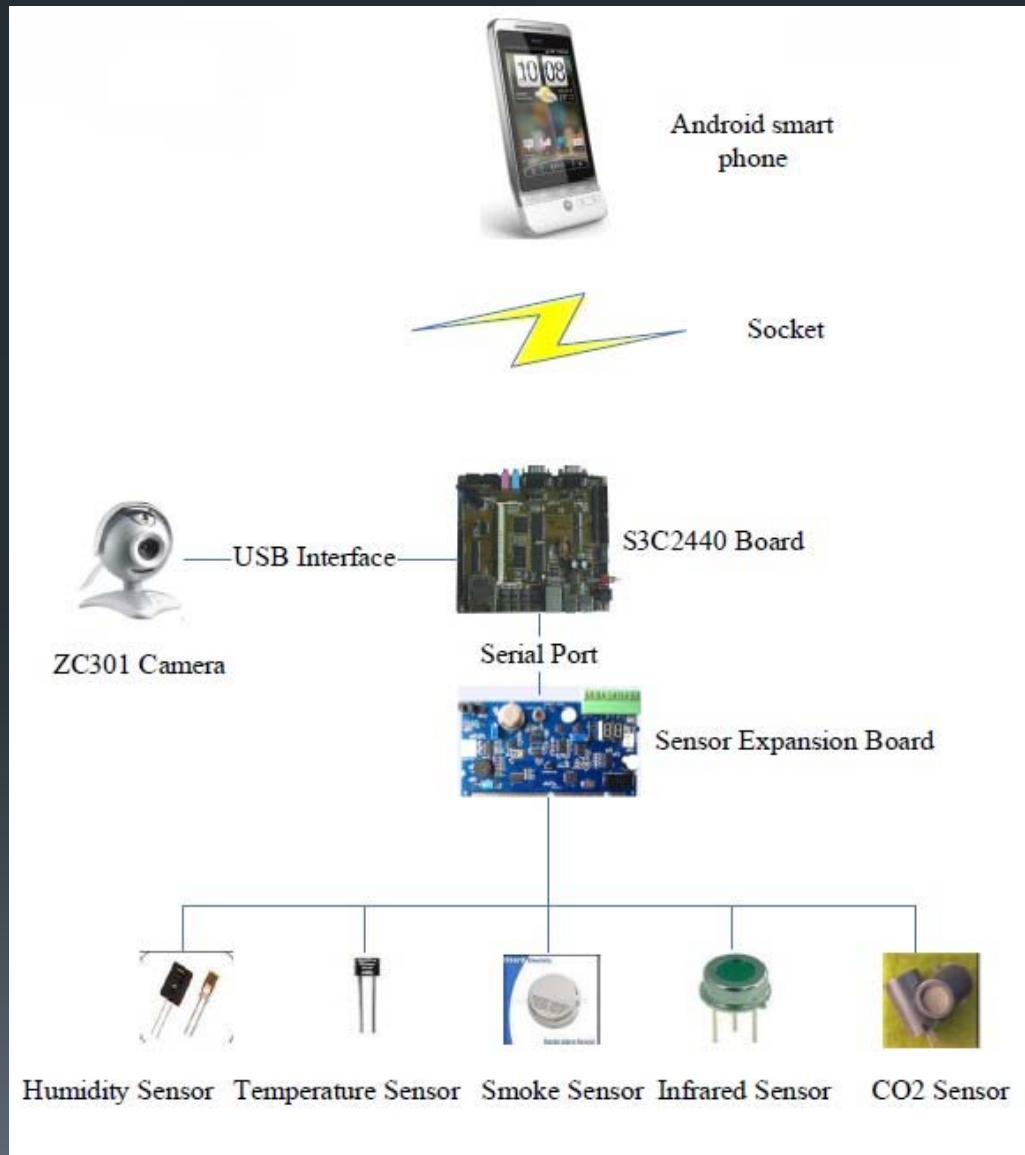

- High Mobility
- Intelligent Head-Equipment
- High Performance
 - Real-Time Surveillance Video Transmission
 - Video Processing (e.g., invasion detection)

Why Android?

- Low Cost
- Powerful Performance
- Highly Integrated Modules
- Small Size
- Easy to Install and Remove
