

FIT5190 Tutorial

Literature Analysis

Work in pairs.

1. Select a topic.
2. Use Google Scholar to identify two key papers on the topic. Explain why you believe these are key papers.
3. List the key contributions that each paper claims to have made to the field.
4. When was each paper published?
5. Use the resources discussed in the lecture to assess the quality of the venue in which each paper was published. Make a note of your conclusions.
6. Use Google Scholar to find how many citations each paper has received.
7. For each paper find a further paper that cites it. What does each citing paper say about the paper it cites?
8. Write out the bibliographic details of the four papers you have investigated in the format of a references section of a paper. Use an established bibliographic reference style.
